26 November 2010

MEMORANDUM

To: All Engineering Staff

From: Loh Fook Yuen

SINGAPORE STANDARD SS 555 : 2010 (PARTS 1 TO 4)
CODE OF PRACTICE FOR PROTECTION AGAINST LIGHTNING

SS 555 : PART 1 : 2010 (GENERAL PRINCIPLES)
SS 555 : PART 2 : 2010 (RISK MANAGEMENT)
SS 555 : PART 3 : 2010 (PHYSICAL DAMAGE TO STRUCTURES AND LIFE HAZARD)
SS 555 : PART 4 : 2010 (ELECTRICAL AND ELECTRONIC SYSTEMS WITHIN STRUCTURES)

We have purchased the above 4 parts of SS 555 for our Library. The table of contents for each part of the Code of Practice is attached for your reference.

FOREWORD 10
INTRODUCTION 12

1 Scope 13
2 Normative references 13
3 Terms and definitions 13
4 Lightning current parameters 19
5 Damage due to lightning 19
5.1 Damage to a structure 19
5.2 Damage to a service 22
5.3 Types of loss 23
6 Need and economic convenience for lightning protection 25
6.1 Need for lightning protection 25
6.2 Economic convenience of lightning protection 26
7 Protection measures 26
7.1 Protection measures to reduce injury of living beings due to touch and step voltages 26
7.2 Protection measures to reduce physical damage 26
7.3 Protection measures to reduce failure of electrical and electronic systems 27
7.4 Protection measures selection 27
8 Basic criteria for protection of structures and services 27
8.1 Lightning protection levels (LPL) 28
8.2 Lightning protection zones (LPZ) 32
8.3 Protection of structures 33
8.4 Protection of services 34

FOREWORD 12
INTRODUCTION 14

1 Scope 16
2 Normative references 16
3 Terms, definitions, symbols and abbreviations 16
4 Explanation of terms 26
4.1 Damage and loss 26
4.2 Risk and risk components 28
4.3 Composition of risk components related to a structure 30
4.4 Composition of risk components related to a service 32
4.5 Factors influencing the risk components 33
5 Risk management 34
5.1 Basic procedure 34
5.2 Structure to be considered for risk assessment 34
5.3 Service to be considered for risk assessment 34
5.4 Tolerable risk R_T 35
5.5 Specific procedure to evaluate the need of protection 35
5.6 Procedure to evaluate the cost effectiveness of protection 36
5.7 Protection measures 38
5.8 Selection of protection measures 38
6 Assessment of risk components for a structure 41
6.1 Basic equation 41
6.2 Assessment of risk components due to flashes to the structure (S1) 41
6.3 Assessment of the risk component due to flashes near the structure (S2) 41
6.4 Assessment of risk components due to flashes to a line connected to the structure (S3) 42
6.5 Assessment of risk component due to flashes near a line connected to the structure (S4) 42
6.6 Summary of risk components in a structure 44
6.7 Partitioning of a structure in zones Z_S 44
6.8 Assessment of risk components in a structure with zones Z_S 45
7 Assessment of risk components for a service 46
7.1 Basic equation 46
7.2 Assessment of components due to flashes to the service (S3) 46
7.3 Assessment of risk component due to flashes near the service (S4) 46
7.4 Assessment of risk components due to flashes to structures to which the service is connected (S1) 47
7.5 Summary of risk components for a service 47
7.6 Partitioning of a service into sections S_S 48
