Foreword - - - - - - - - - 6

CODE OF PRACTICE

Section One. Scope and general

1.1 Scope - - - - - - - - - 7

1.2 Application - - - - - - - - - 7

1.3 Referenced documents - - - - - - - - 7

1.4 Definitions - - - - - - - - - 7

Section Two. Analysis of need for protection

2.1 General - - - - - - - - - 12

2.2 Need for protection - - - - - - - - 12

2.3 Need for personal protection - - - - - - - 18

2.4 Need for protection of persons and equipment within buildings - - 18

Section Three. Protection of buildings

3.1 Scope of section - - - - - - - - 22

3.2 Zones of protection - - - - - - - - 22

3.3 Methods of protection - - - - - - - - 23

3.4 Matters to be considered when planning protection - - - 30

3.5 Materials - - - - - - - - - 31

3.6 Form and size of conductors - - - - - - - 36

3.7 Joints - - - - - - - - - 38

3.8 Fasteners - - - - - - - - - 38

3.9 Air terminations - - - - - - - - 39

3.10 Downconductors - - - - - - - - 41

3.11 Test links - - - - - - - - - 42

3.12 Earth terminations - - - - - - - - 42

3.13 Earthing Electrodes - - - - - - - - 45

Page

3.14 Metal in and on a structure - - - - - - 46

Section Four. Protection of miscellaneous structures and property

4.1 Scope of section - - - - - - - 52

4.2 Structures with radio and television aerials - - - - 52

4.3 Structures near trees - - - - - - - 52

4.4 Protection of trees - - - - - - - 53

4.5 Chimneys, metal guy-wires or cables - - - - - 53

4.6 Protection of mines - - - - - - - 54

4.7 Protection of boats - - - - - - - 56

4.8 Fences - - - - - - - - - 58

4.9 Miscellaneous structures - - - - - - 58

4.10 Protection of houses and small buildings - - - - 59

Section Five. Protection of structures with explosive or highly flammable contents

5.1 Scope of section - - - - - - - 61

5.2 General considerations - - - - - - - 61

5.3 Areas of application - - - - - - - 61

5.4 Equipment application - - - - - - - 62

5.5 Specific occupancies - - - - - - - 63

Section Six. Installation and maintenance practice

6.1 Work on site - - - - - - - - 69

6.2 Inspection and testing - - - - - - - 69

6.3 Records - - - - - - - - 69

6.4 Maintenance - - - - - - - - 70

Section Seven. Protection of persons within buildings

7.1 Scope of section - - - - - - - 71

7.2 Need for protection - - - - - - - 71

7.3 Modes of entry of lightning impulses - - - - - 71

Page

7.4 General considerations for protection - - - - - 72

7.5 Protection of persons within buildings - - - - - 73

APPENDICES

A. The nature of lightning and the principles of lightning protection (informative) - - - - - - - 77

B. Notes on earthing electrodes and measurement of earth impedance (informative) - - - - - - 88

C. The calculation of lightning discharge voltages and requisite separation distances for isolation of a lightning protection system (informative) - 104

D. Waveshapes for assessing the susceptibility of equipment to transient overvoltages due to lightning (informative) - - - - 113

E. Protection of equipment within or on structures against lightning (informative) - - - - - - - - 118

F. Assessment of risk of damage to electronic equipment within or on structures due to lightning (informative) - - - - 125

G. Behavioural precautions for personal safety (informative) - - - 164
