ACTIVE POWER®

Intuitive UPS operator interface

CLEANSOURCE® OPERATOR INTERFACE

user-customized displays | **flexible** | **800 X 600** | **10"** | **2000 events**

Active Power CleanSource UPS systems feature a state-of-the-art operator interface to provide users with maximum visibility to system status, performance, events and maintenance requirements. With a brilliant 10" LCD display and intuitive touch-screen controls, the CleanSource UPS operator interface adds a new level of system visibility that gives you the control you need to monitor your critical power infrastructure.

BENEFITS OF IMPROVED VISIBILITY

Functional

- System one-line provides high visibility to system status
- Event log with e-mail notification gives early warning to problems and assists in troubleshooting
- Real-time telemetry for all major performance indicators
- Maintenance records and service notifications help improve system reliability

Flexible

- Dynamic display of status in 9 languages
- Multiple security levels align user skills with access
- Custom system reports and performance notifications
- Users can view reports and event logs on screen, or via remote Internet access
- Data can be downloaded to a USB drive or sent via e-mail

Easy to use

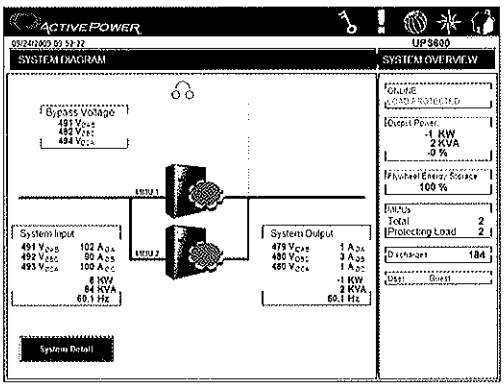

- Brilliant full-color 10" LCD
- Intuitive touch-screen graphical navigation
- Color status indicators (green, yellow, red)

Demo CleanSource UPS Operator Interface NOW

CleanSource System Monitoring

Operator Interface Screens

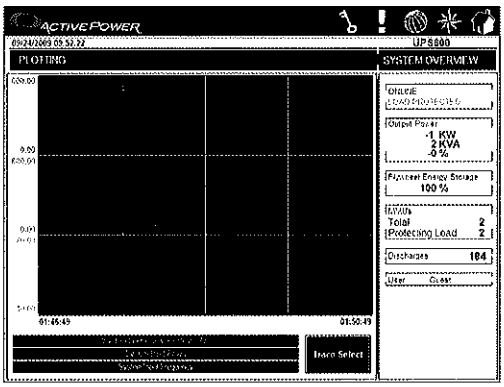

System home page

- Dynamic system one-line diagram
- Real-time key performance indicators

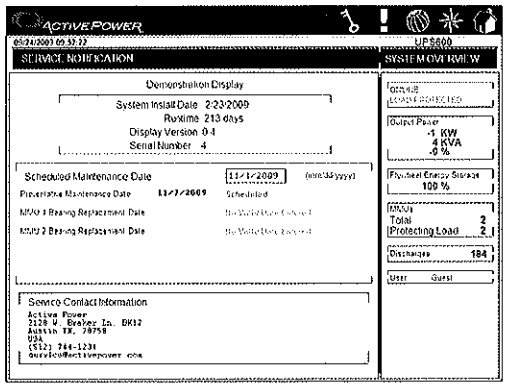

Events

- 300 events viewable on screen
- 2,000 events stored for download or e-mail
- Custom notification options

Telemetry

- Snapshot and real-time graphing
- For whole system and individual flywheel modules

Service

- Maintenance schedule & notifications
- Procedure instructions & downloads

Get Connected, Stay Informed

The CleanSource UPS operator interface is one part of a complete suite of system visibility options Active Power makes available to you to ensure the performance and reliability of your system. By utilizing common data and connectivity with our CleanSource View (CSView) monitoring and control software and data integration options to your Building Management System (BMS), we can offer you the degree of system visibility and service that you need to manage your critical power infrastructure.

1. Operator Interface

- Easy-to-use display for at-system visibility
- The tools you need at the touch of an icon: system one-line, event logs, maintenance records, real-time telemetry and more

2. Active Power CSView Monitoring & Control Software

- Enables constant visibility of your critical power infrastructure via a unique, user-friendly software tool from virtually anywhere
- Provides real-time telemetry in a variety of intuitive formats via continuous monitoring and evaluation of your Active Power systems
- Accessible on site or from anywhere in the world
- Cell Phone, PDA, Email Notification
- Connectivity options:
  - Serial Connection
  - Modem Connection
  - Ethernet Connection

3. Data Integration to Your Building Management Software

- Provides the most basic level of performance data integration
- Order with your CleanSource UPS and seamlessly integrate Active Power UPS performance into your Building Management Software (BMS) system
- Connectivity options:
  - MODBUS
  - SNMP

4. Active Power Monitoring Services Utilizing CSView

- Ensure pure peace of mind by pairing CSView software with remote monitoring service – then focus on your business
- Receive all the benefits of CSView monitoring and control software, plus the professional expertise of our service engineers
- With a modem connection, your system notifies Active Power of critical conditions so we can remotely diagnose potential issues and contact you PROACTIVELY with an action plan
- Monitoring services entitle you to a monthly review and report on your system performance
