
oeelectrics
always innovating

We're sorry...

We're sorry if you opened this brochure expecting to find another 'run of the milll' electrical distribution supplier. We're sorry if you were hoping for a dull array of linear, same as.. unimaginative products you could find anywhere. We're sorry because you won't find any of that here. OE Electrics simply don't do ordinary. We make a point of designing products and solutions in a way that makes peoples' lives better.

As the customer you are the most important element in any design. Whether it's a product specifically for your range of furniture, a one off special for a client, or a standard unit for a 1000 offices in Dubai, you are the most important part of the solution. Without you the solution would never happen. Without you we would never have become one of the most successful companies in our industry. You drive us to imagine, innovate, dream and have the compulsion to always provide better service, better quality and unbeatable safety standards than any other company in our industry.

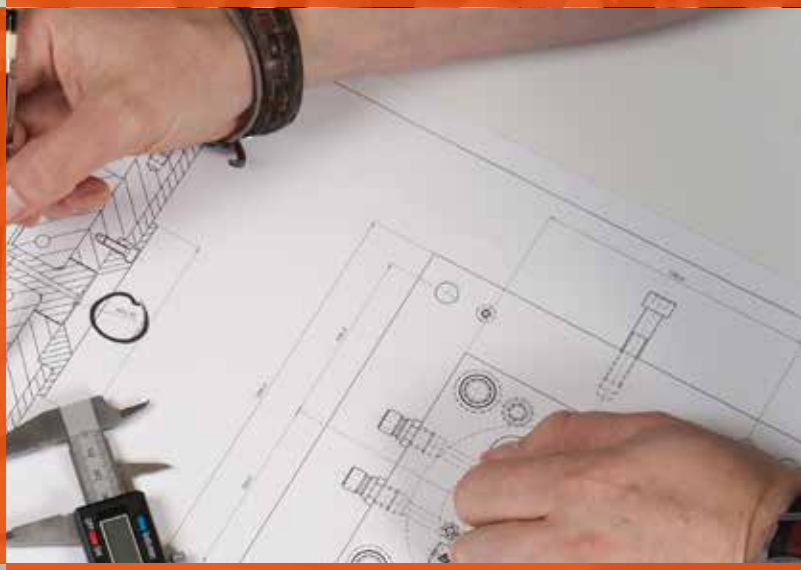
So thank you...

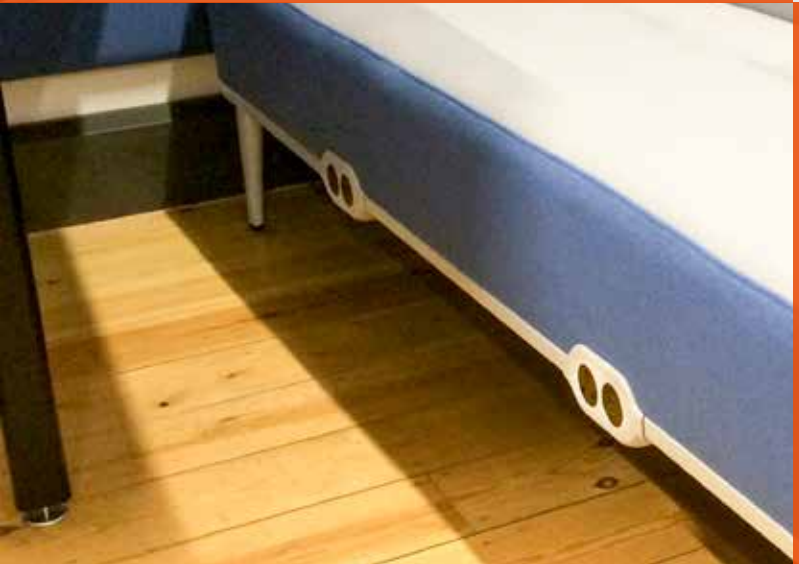
MADE IN BRITAIN

You need power, and you need it now! We live in a very busy world and the world is full of people who no longer work in the confines of the conventional office. In fact you're just as likely to be working on a sofa with a laptop on your... well lap! as you are to sitting at a desk. The workplace is no longer what it was: it can be anywhere and often is!
The work environment is evolving and OE Electrics is evolving with it.

But with this evolution of working practices come hurdles. The unfortunate nature of these wonderful technical devices is their reliance on power. Until battery technology greatly improves we are all slaves to the wall socket.
OE Electrics understand the increasing need to have well designed power modules as conveniently placed as possible. We do this by researching people's needs and habits within not only the workplace but everywhere.

We firmly believe that innovation is crucial to the continuing success of any organisation and it's at the heart of everything we do. It's our mission to not only design the best products in the world, but to make your experience of working with OE as pleasant as possible. You'll have to forgive us if we ask a lot of questions, but we believe the best way to give you the service you deserve is to know you as much as we can.





But it doesn't end there. OE are always available to help. We feel we have a duty of care to offer you the best suited product, not the most expensive. We carry with us the best experts and designers in the industry and they like to show off!

Ask us... Ask us anything! We love to help.

Customise it!

Every OE Electrics product can be customised to suit your needs.

pandora

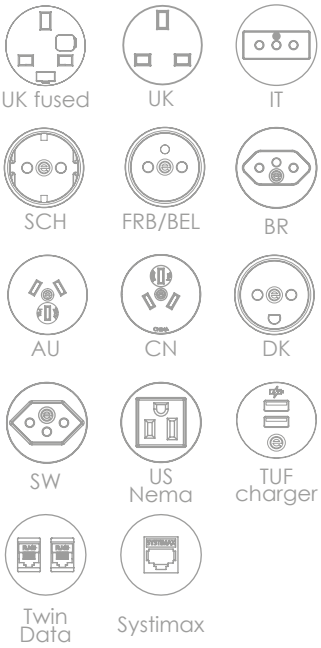
PANDORA offers an exciting new way to provide power to your meeting area. Compact, elegant and efficient, PANDORA allows 360° access to international power and powerful 5A USB charging outlets.

Combining high quality design with compact features, PANDORA forms the perfect solution for your power distribution needs. PANDORA is available in black with stainless steel inlays, or with a bevelled edge in white or black.

Composed of impact resistant, 3mm super strong PC-ABS, PANDORA can easily withstand the day to day bumps and bruises of modern life. Suitable for the office, cafe, or hotel reception, PANDORA delivers a great solution for all.

NEW!

Customise it!



Every OE Electrics product can be customised to suit your needs.

PEAK offers a low profile elegant alternative to PAGODA. Available in matt white or brushed stainless steel with four outlets each side, PEAK can facilitate the modern meeting table with ease.

Made from extruded aluminium, with PC-ABS socket fascias and finished with a stainless steel or powder coated matt white steel faceplate, PEAK has the look of elegance, and is made to last.

The combination of subtle design features and well manufactured parts allows Peak to 'hover' on the table surface.

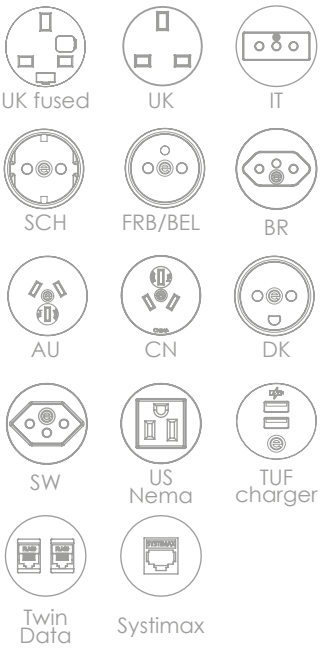
peak

PHASE is an exciting new concept in power modules from OE Electrics, that is ideal for providing convenient but discreet power and data in offices, hotels, restaurants, airports and many other locations.

Compact, robust and unconstrained by convention, you will find PHASE with its innovative concealed mounting bracket and through back or through base cable entry options, simple to securely install on desks, tables and soft furnishings.

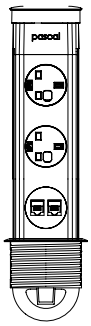
PHASE is available in either white or black with your choice of grey or black socket fascias. The two socket apertures can be configured with a combination of power and data sockets from the extensive OE 42mm modular range.

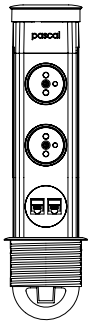
Customise it!

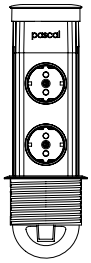


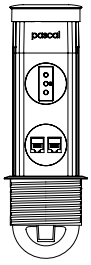
Every OE Electrics product can be customised to suit your needs.

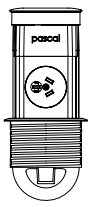
phase

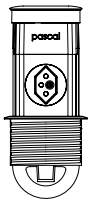










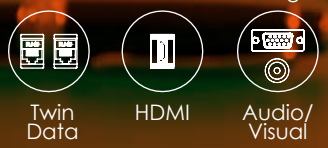


pascal

PASCAL is the new through desk unit from **OE** Electrics. PASCAL utilises the office furniture industry standard 80mm cable port aperture. When closed, PASCAL has a handy TUF charger stored in the lid for ease of access.

When not in use PASCAL is hidden neatly beneath the worksurface, a simple twist of the top cap is all that is required for PASCAL to pop up ready for use.

Customise it!



Every OE Electrics product can be customised to suit your needs.

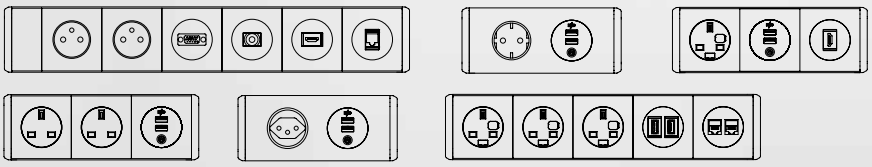
polarICE & blackICE

polarICE and blackICE bring power and data connectivity to the desktop in a sleek ice cool package. With a unique range of options as to appearance and fitting. Both models are now available with our advanced twin USB fast charging socket, in addition to country specific AC power sockets and Data/AV modules. White or black Snap on fascias and domed end caps, with contrasting grey or black socket fascias give ICE a distinctive modern look. In addition a wide range of fixing options allows ICE to be quickly and neatly fitted to most desks and screens, often without the need for special tools or under desk access.

PANDA reinvents our successful polarICE concept of snap on decorative end-caps and sockets frames with a distinctive and more compact design thus combining the functionality and style to suit the most demanding project requirements.

PANDA is available as standard with white frames and black end caps and sockets for the high contrast "Panda" look, white frames and end caps with grey sockets for the classic polarICE look, or last but not least striking all black.

panda



Customise it!

Every OE Electrics product can be customised to suit your needs.

8 Standard colours available
(other colours available on request)

panda-8

For a more fun and distinctive option then why not order PANDA-8 with a one piece aluminium frame in one of our 8 special paint colours with optional white sockets (UK BS1363 & TUF only). Specific RAL colours are available.

For the premium European look then specify PANDA with a natural anodised extruded aluminium front plate, with black sockets and end caps.

PLUTO satisfies a demand for power and data connectivity, in informal spaces, in a way that no other module has done before. Perfectly suited to breakout areas, smaller meeting rooms and coffee tables - PLUTO makes sharing power a pleasure. Studies show that people work far more effectively in small groups and indeed new ideas come from people working in pairs.

With over 25 years experience in the market, and as leaders in terms of design and practicality, OE Electrics have developed PLUTO to match our customers' desire for a solution that fits these new ways of working.

With 3 outlet positions, PLUTO is perfect for a small team to power/charge their devices using conventional mains plugs or USB.

pluto

Customise it!

Every OE Electrics product can be customised to suit your needs.

PLUTO comes in either polished white or black satin finish as standard but is available in a number of special finishes. Almost any colour can be applied* and then finished as standard satin, gloss, or 'soft touch'.

We have an enormous selection of patterns available, all produced by a means of immersion transfer. All patterned PLUTOs can be finished in matt, satin, gloss, or soft touch lacquer. (please have a look at the website for further examples)

pluto:
data cartridge

data/av

Data
HDMI
Audio
USB
VGA

The Pluto Data Cartridge has been designed to add additional data and AV connectivity to the standard Pluto power module and is thus an exciting new option for meeting tables where a traditional in-desk unit is not suitable.

The Pluto Data Cartridge simply bayonet fits to the Pluto base and therefore can be supplied pre-fitted to new Pluto's or for retro fitting to existing units.

NEW!

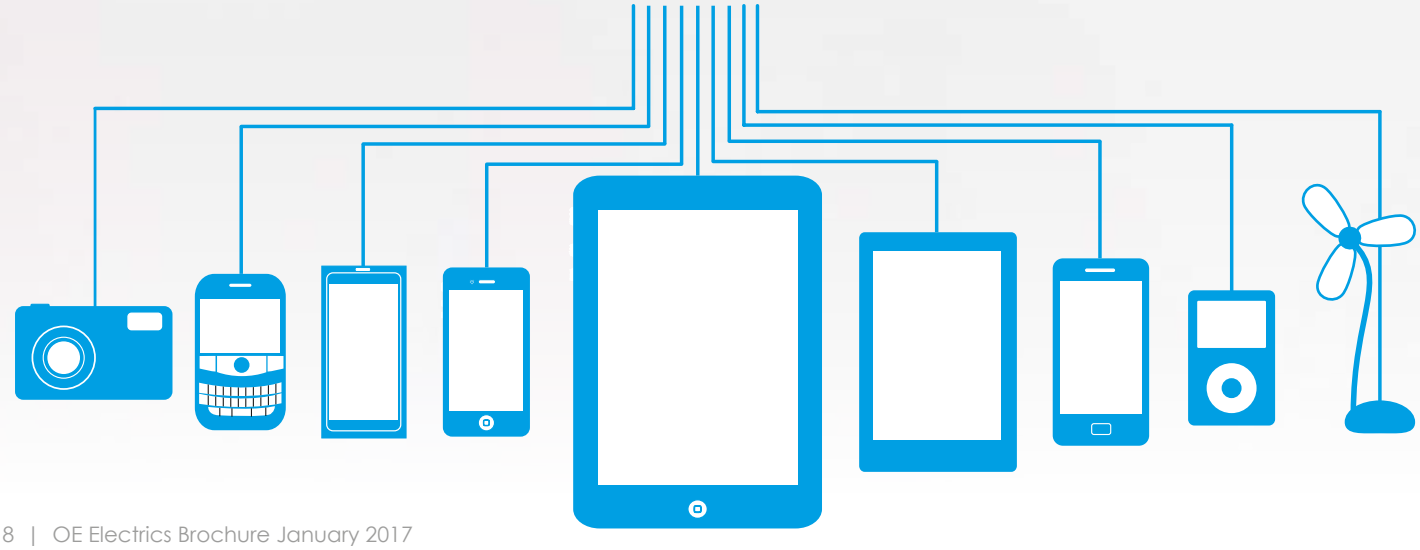
planet

Make a statement with the NEW OE Electrics' PLANET. Mix and match colours to make the perfect solution for your environment. Perfect for your breakout areas, cafés, and meeting rooms. PLANET is available with international connectivity and data cartridge. It's easy to install without the need for tools and is made to the highest standards, making it very resilient against the knocks and scrapes of day to day life.

TUF 5A



TUF5A represents a giant leap forward in USB charging technology. Capable of 5A, with a cable compensated 5V output, TUF5A employs IDR (Intelligent Device Recognition) to ensure Optimum 'Full-Power' Delivery to any two of your devices simultaneously.

Its 'ruggedized' connectors allow in excess of 5000 insertions*, and TUF5A has also been independently tested to the latest International Safety and EMC standards. Along with protection against overload, ultra-low standby power and boasting class-leading efficiency of up to 91%, this surely makes TUF5A the best USB charger available today!

Key Features:

5 amps (25W) combined maximum output
Fast charge 2 devices, at up to 2.5A, simultaneously
Intelligent Device recognition
5000+ insertion USB connectors*
Up to 91% efficiency
Independently tested to IEC & UL 60950-1

*Insertion lifetime refers to USB contacts only

pendulum cradle

8 Standard colours available
(other colours available on request)

pose

POSE is a unique and versatile solution from the OE design team for providing a conveniently locatable power or USB charging socket in casual seating areas.

POSE is supplied as standard with the flexible chrome plated steel gooseneck attached to a weighted base but can also ordered with bespoke fixings for mounting direct to furniture, seating or even hospital type bed frames.

POSE can be ordered with either a black or grey socket fascia, and to add a distinctive finishing touch the standard white socket bezel can be ordered in black or any of the 8

Less is definitely more with our "minimalistic" PENDULUM power module. Designed to provide the user with a conveniently locatable power or USB charging socket, PENDULUM not only adds style but also a splash of colour to the workplace with its exciting socket and bezel colour options.

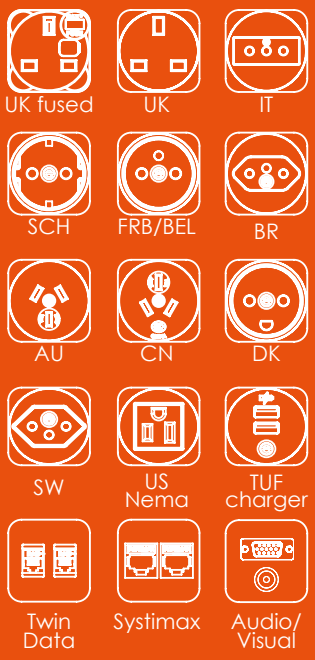
pixelTUF

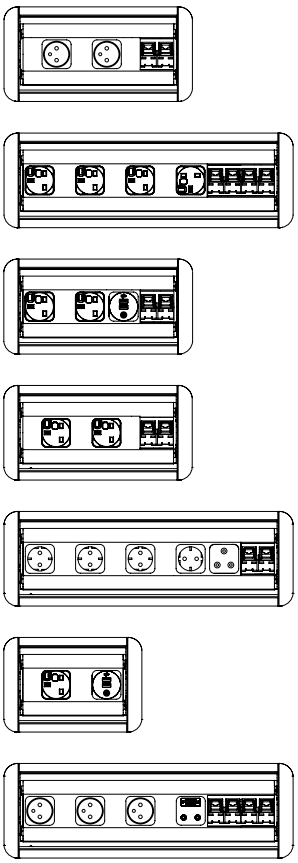
PixelTUF enables the time-short mobile worker to charge a laptop at the same time as charging their mobile phone and tablet! Perfect for hot desks, drop in areas, airports & hotels.
PixelTUF fits almost flush at any angle into a standard 80mm grommet cut out without the need for tools. You may even forget it's there until you need it.

platinum

Customise it!



Every OE Electrics product can be customised to suit your needs.



Versatile in desk unit fitting flush to the worktop allowing full use of the workspace. Particularly suitable for meeting tables and other locations where space or uncluttered appearance is important.

Standard finish anodised aluminium with black or silver grey plastic mouldings. Also available with a variety of specialist finishes including gold and brass with plastic fascias. PRISM is also available in black or white extrusion and endcaps.

PRISM/PLATINUM is designed to operate in the closed position with equipment plugged in. Capable of being closed with most standard types of transformer plugs connected. When in the open position it can be accessed from both sides making the Prism particularly suitable for the centre of meeting and boardroom furniture.

prism

Customise it!

Every OE Electrics product can be customised to suit your needs.

pip

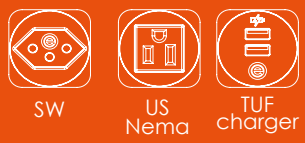
Coming March 2017

Fitting into a 60mm aperture and with a depth of only 40mm, PIP satisfies a diverse number of situations. A perfectly formed circular outlet, available in eight standard colours plus black or white, with an optional steel inlay, PIP is ideal for integrating power into small spaces.

Installation couldn't be simpler. PIP can be either clipped or screwed into the panel aperture with a smart plug and play system to allow for safe and easy installation.

TUF inside

Customise it!



Every OE Electrics product can be customised to suit your needs.

PAGODA is a stylish new solution from OE Electrics for supplying user accessible AC power, USB charging, data and AV connections to the conference table. Not just stylish and functional but quick to install; PAGODA simply clamps to a standard 80mm grommet hole.
It's high quality finish defines PAGODA; the single piece curved top available in brushed stainless steel or with immersion transfer print finish.

Specify PAGODA with one of our LED feature lighting options for an even more distinctive look.

pagoda

poco

POCO mounted vertically takes up less than 50mm of desk space yet is capable of providing all the facilities required in the modern office. POCO is suitable for Hot-desking, personal power as well as assisting in meeting the requirements of the Disability Discrimination Act (DDA) in the workplace by providing facilities accessible to all on the work surface.

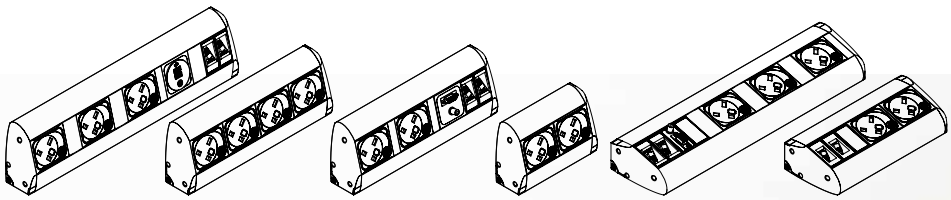
Used in conjunction with underdesk units POCO provides a total solution for power and data connectivity at the workstation.

pearl

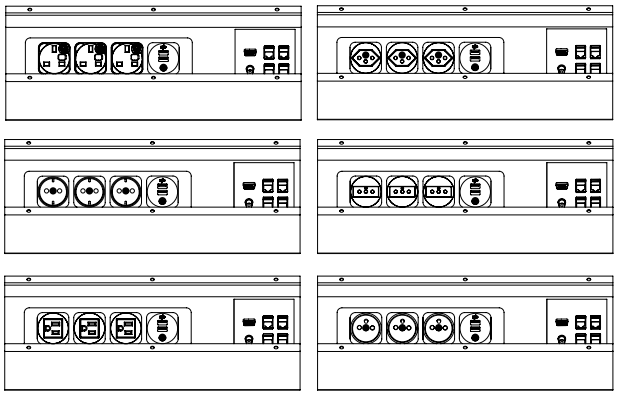
Customise it!

Every OE Electrics product can be customised to suit your needs.

PEARL has been introduced in response to the changing needs of the commercial office environment. With white endcaps and fascias in a white body, PEARL reflects the predominant colour scheme of contemporary furniture – silver/grey frame with white work surfaces. PEARL has, like the full range of OE Electrics products, been designed to allow soft power cabling, soft data cabling and soft fixing onsite.

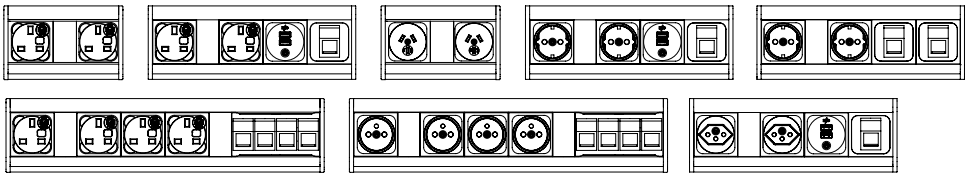


axxess-plus



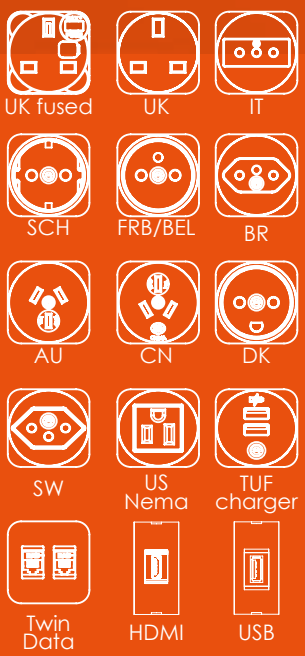
Frameless, 'perfectly-flush', through-desk access port for the discerning user, the axxessPLUS represents the top-of-the range in through desk units. Developed to satisfy the most discerning desk-user, axxessPLUS maintains the superb finish of the most luxurious desks, whilst providing easy access to power and data services.

Available with two doors or one door with brush strip. Finishes available in silver naturally anodised aluminium or recessed to accept a suitable veneer.



TUF inside

Customise it!



Every OE Electrics product can be customised to suit your needs.

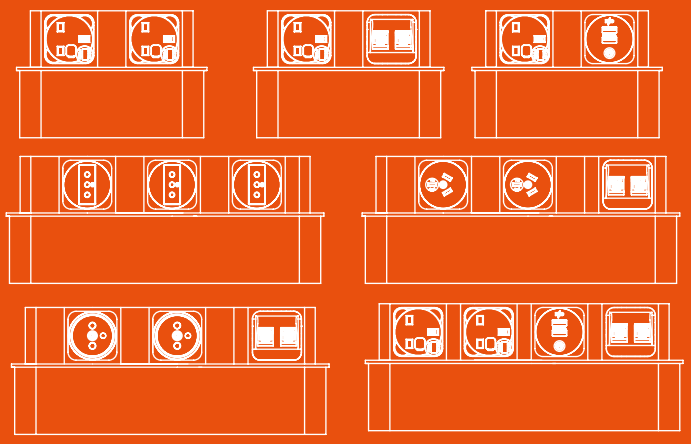
pod

A desk top unit designed to provide an aesthetically pleasing yet practical solution for desk top power, data and telecom connections. Particularly suited for hot-desking situations or simply to provide personal desk top power for the general office. POD units can assist with meeting the requirements of the Disability Discrimination Act (DDA) in the workplace by providing facilities accessible to all on the work surface.

pivot

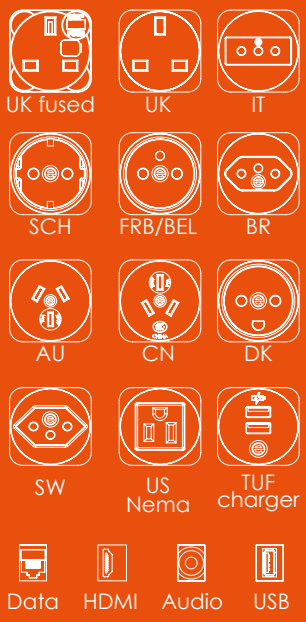
An ultra-compact in-surface power, data and AV unit with press and full soft-eject mechanism.

OE Electrics' design brief for their new longitudinal in-surface module was for: the most compact; simplest to install; internationally compatible and technically capable; auto-opening power and data module on the market, whilst maintaining a sleek design aesthetic and robust high quality feel.



axxess

Customise it!



Every OE Electrics product can be customised to suit your needs.

All in one In-Desk power and data management solution.
The AXXESS series (In desk box) is cost effective, visually attractive and surface mounted, making it simple and easy to install.
The AXXESS provides power & data solutions to your desktop, work station or boardroom table.
The lid sits flush when in use and the cables exit via the spring release lip.
Table thickness ranging 15-33mm can be accommodated.

Customise it!

Every OE Electrics product can be customised to suit your needs.

puma

A super compact panel mounted unit providing flexible modular power and data distribution. Ideal for office screens where a limited number of outlets is required.

PUMA is designed for panels, whether the panel is a desk screen, modesty panel or even the side of an arm chair, PUMA can easily be snapped or screwed into place. PUMA may be specified to meet particular requirements.

Mains power sockets formats for all countries together with a wide range of data outlets. Special units with remote switches, thermal resettable fuses, power cleaners. Standard colour is grey or black frame and black sockets, other colours are available subject to minimum order quantities.

TUF inside

PUMA can be fully integrated into your design to give a more finished look

PUMA can be used in conjunction with other cable management components and be fully integrated into the desk architecture to create a complete solution.

NEW!

petra

PETRA is stylish panel mounted option from OE offering a more refined approach to your power and data solution.

PETRA is available with a choice of international power outlets and data sockets and, of course, our class leading 5A USB charger.

PETRA clips neatly into the rectangular aperture without the need for tools making it an ideal partner to bench systems or personal power provision

Customise it!

Every OE Electrics product can be customised to suit your needs.

PROTON, as the name suggests, has been designed to provide AC power or USB fast charging in its simplest form. Designed for panel mounting in furniture, PROTON presents a single or double outlet module in a stylish matt silver, matt black, gloss black or chrome decorative bezel. PROTON is supplied as a prewired unit with power cable to a national mains plug or Wieland connector, ready for installation.
PROTON can be configured to provide combinations of AC power, USB fast charging and/or data as needed by the user.

proton

pathfinder

The Pathfinder system from OE Electrics has been designed from 25 years experience in supplying cable management products, to offer a complete floor to desk, floor to ceiling, or ceiling to desk, vertical cable management solution.

Key PATHFINDER features include :

• A unique PATHFINDER GROMMET for feeding under floor cables directly into the umbilical

• Extendable sections to allow fixed desk, height adjustable desk or ceiling termination

• A wide range of floor, desk and ceiling fixing options to provide total cable management of cables

• Internal segregation for power and data cables to comply with BS regulations

• Flexible umbilical in white, clear polycarbonate or silver

Combine PATHFINDER with PATHWAY cable tray for optimum cable management

pathfinder grommet

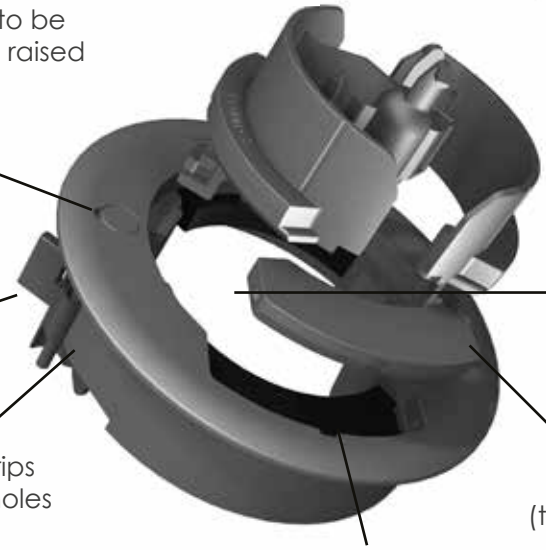
PATHFINDER Floor Grommet is the first of its kind to enable **TOTAL CABLE PROTECTION** from desk to underfloor, when used in conjunction with Pathfinder Umbilical.

Designed to QUICK-FIT into industry standard 5 inch / 125-128mm cutouts, the PATHFINDER Floor Grommet can be used as a conventional floor pass-thru, allowing power / data cabling, including 16mm flexible conduit, to exit via the Side Lids.

But, if used in conjunction with PATHFINDER Umbilical, using PATHFINDER Grommet Adaptor, it can even accommodate multiple 20mm / 25mm data conduits as well.

IEC 61534-22 compliant

Industry standard size grommet allows it to be retrofit into existing raised floor apertures



Screw Caps

Grommet Adaptor (bayonet connection)

OPTIONAL quarter turn spring loaded clamps for 10mm - 50mm floors

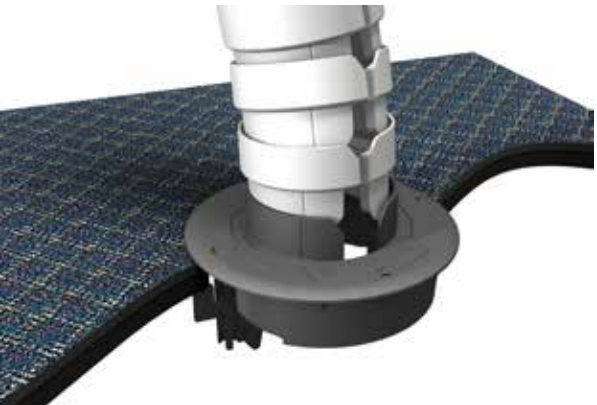
Large centre aperture allows, industry standard, track tap-off plugs and even POWERBOX PDUs, with RCBOs installed, to be passed through the floor

STANDARD Push Fix Grips can accommodate holes from 125mm - 128mm (5inch)

Tethered Side Lid (tool release)

Foam Air Block for pressurized floors

Pathfinder integrated floor grommet



Pathfinder cable 'ZIPPER' for easily routing cables

powerbar 2P20 M#/BE*

*2P20 M#/BE can be built to customers' specification. See website for details.

POWERBAR provides a BS6396 compliant UK fused socket power module at a competitive price point and with the build quality and reliability expected of an OE Electrics product.

The standard POWERBAR is available from stock in 2, 4 and 6 socket versions and the integrated GST18-3 connectors allow units to be clipped together or interlinked by cables with other power modules.

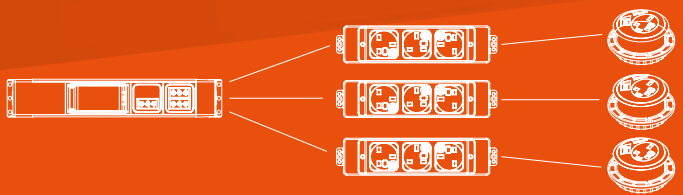
The all new POWERBAR 2P20 combines two fixed position UK fused sockets with two apertures that may be configured to order with a choice of AC power, USB charging and data/AV sockets from OE's new 42mm modular range. Great additional functionality with traditional POWERBAR reliability and value.

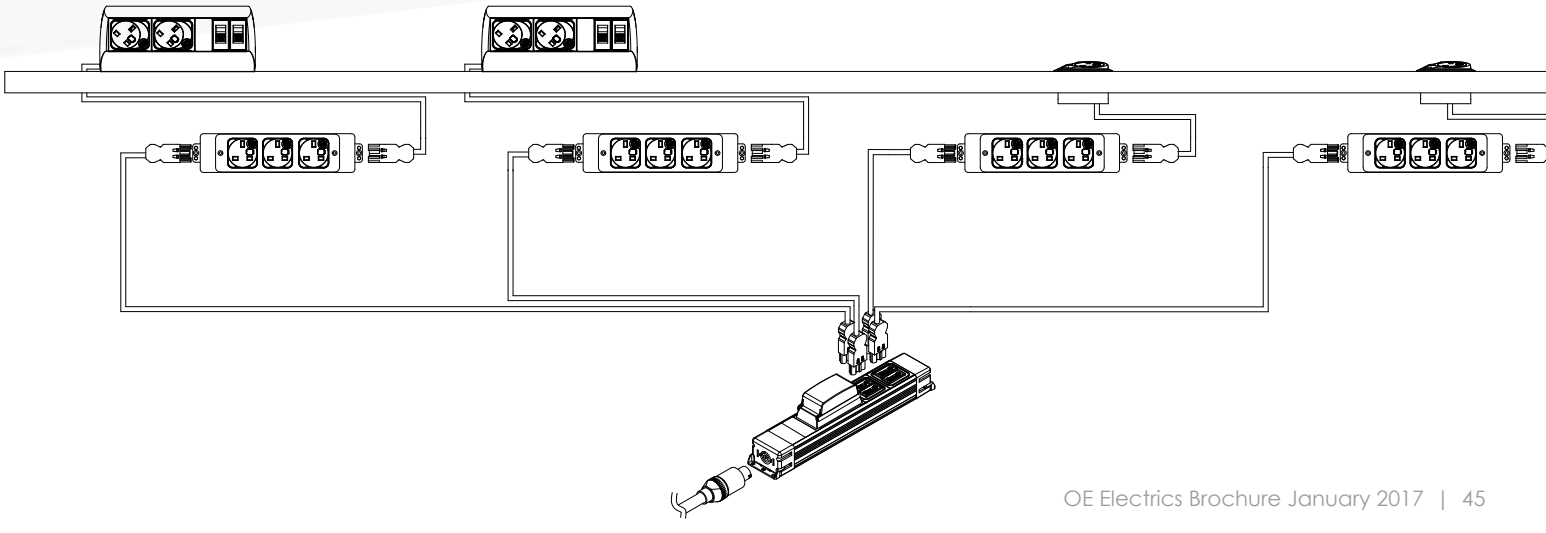
Through body screw fixings and accessory clips plus the optional new satin silver finish panel mounting frame, enable POWERBAR 2P20 to be fitted in a wide variety of ways to cable trays, screens and other furniture panels.

underdesk

Whilst OE has the capacity for market leading design, we don't forget our roots, or those of the soft wiring system. We have a full range of underdesk power and data solutions allowing connection from a national plug socket outlet, complying with relevant standards (such as BS6396 or UL962), or direct from the fixed wiring using a soft-wired power distribution network (under standards such as BS7671 or IEC60884).

Whichever units you choose, our UK sockets are ASTA certified, our international sockets are NEMKO tested and certified to relevant international standards and our manufacturing facility is continually assessed by Intertek / ETL for BS (British) and UL (North American) requirements, providing reassurance to our customers that our assurances of quality and safety are independently corroborated.





OEM

OE Electrics has a long history of assisting clients to design and manufacture their own connectivity solutions, not just by reconfiguring our own products to suit a specific application but also to create completely new products, for their sole use, allowing them to create solutions in harmony with their own product ranges.

From airport seating to laboratories and from conference desk to trading desk we have helped whole industries create their own look and feel, while keeping all the functionality for a global marketplace.

Through this brochure you will get a flavour of all the shapes and options we have developed for our own portfolio, but if nothing grabs your interest, then let us design one for you.

Whether you are faced with a 1000 workstation call centre, the gym's changing room lockers or an international airport lounge there will be a perfect electrical solution for you, and our teams, around the globe, have the depth and breadth of knowledge to help you achieve it – from conception through to reality.

Our in-house design teams can assist your visualization of a proposal, from 3D rendered concept images to line drawings of individually configured products, which we send with every quote, and multi-component assemblies presenting a full cable management package to suit your circumstance.

design

concept

Furthermore, we can even help prepare take-offs from your floorplans - determining cable lengths and installation information, leaving you free to manage the rest of your project.

In development

concept

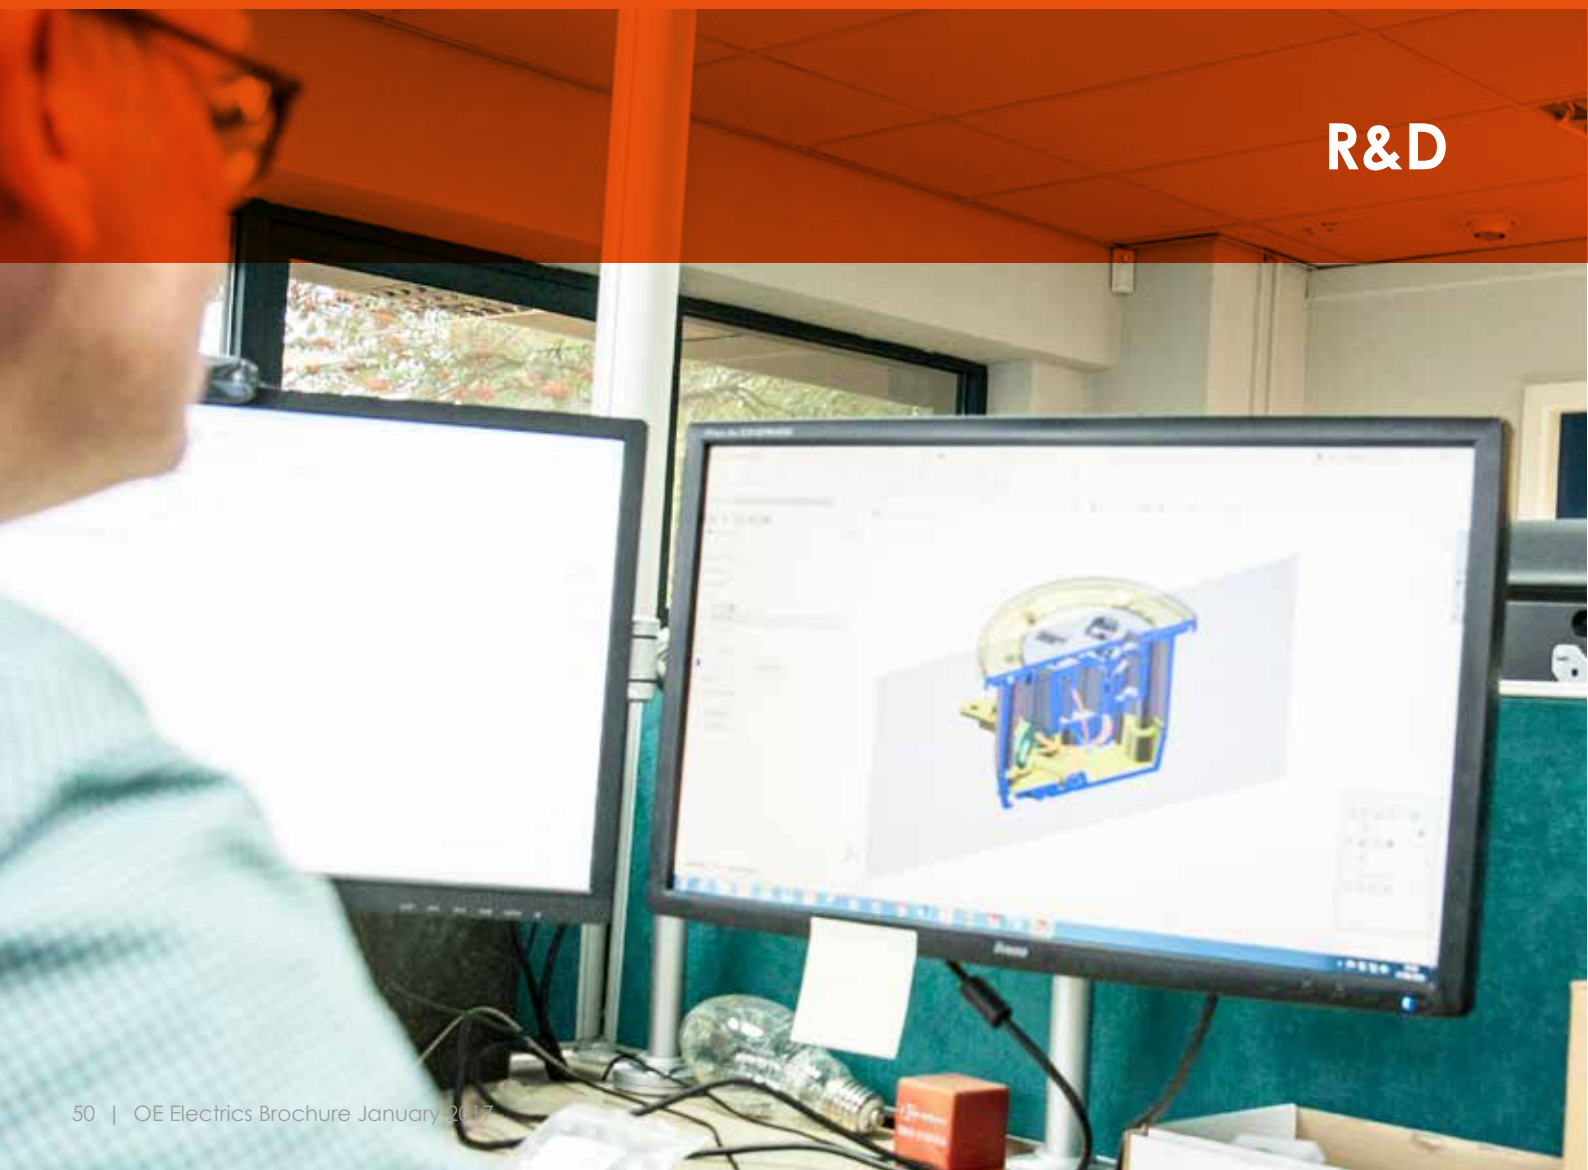
Of course, behind the scenes, we continually invest resources in research, development and testing.

With our own in-house electronics division, we have uniquely been able to develop market leading fast USB charging (TUF) technology, incorporating Intelligent Device Recognition (IDR), overload protection, short circuit protection and compliance to global initiatives for energy performance and minimized standby power.

We can provide analytical comparisons between competitor solutions or alternative technologies, such as Wireless Charging, which together with maintaining a watching brief on technology developments keep us, and our clients, one step ahead of the rest.
Over our 30 year history, we have developed equipment to perform many product safety tests in-house, we have invested in equipment, such as the Fluke DTX1800 Data Analyser and our end-of-line production testing regime is second to none…

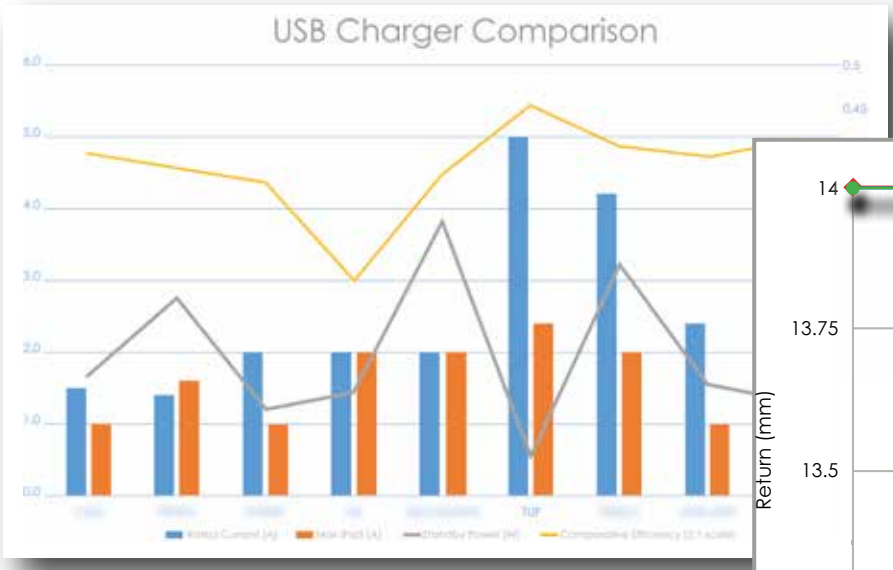
We test
every contact
in every socket
in every unit
for every order

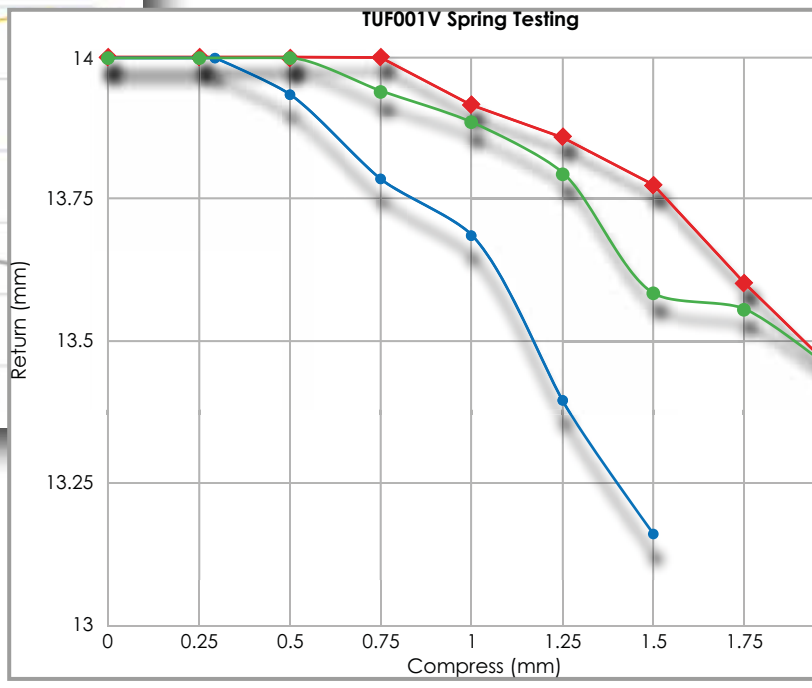
– without exception!



R&D

MADE IN BRITAIN





We are proud we can say "Made in Britain" following our core values of SERVICE, QUALITY and SAFETY.

industry leading technical know how

OE Electrics are experts in their field and with representation on International Standards Committees are uniquely positioned to provide sound, accurate and unbiased electrical advice to ensure standards compliance for your market sector and/or international territory.

All our sockets are independently certified, which together with a product drawings, wiring diagrams and assembly instructions maintain our ISO Accreditation and product certifications.

In addition we work with: consumer groups, such as PlugSafe; local authorities, such as The Electrical Safety Council (UK) and Department of Fair Trading (Australia); and independent testing laboratories, such as NEMKO, Intertek or ETL – to fight threats to electrical safety.

Most recently our activities have concentrated on exposing the illegality of Universal Sockets and the improvement of safety of USB Chargers – each of which have caused accidents or claimed lives in recent years.

Check our website to see white papers on a variety of technical and safety topics, plus links to third party websites and reports.

about us

OE Electrics, originally founded in 1986, as Office Electrics, operates its business on a policy of "Service – Quality – Safety". This enables the company to achieve a highly respected reputation in the commercial office soft wiring and cable management industry, providing cost effective and innovative 'Solutions by Design'.

Operating as a family owned and managed business, an underlying principle that 'people matter' is maintained, because "…it is the people we work with: our customers; suppliers; and, of course, our staff - that make everything possible!"

Our sales and technical teams boast some of the most experienced and respected individuals in the industry, keen to listen to client's needs and propose the most cost effective and user-friendly solutions. Their success measured, not only by the continued repeat business, resulting from their excellent working relationship with clients, but by the 3rd party referrals from clients confident enough to promote us themselves.

In 2006, expansion plans and the globalization of the business took shape, with an office in Dubai serving the Middle East and the acquisition of Elsafe (Australia) Pty Ltd. Together with partnerships in France, Benelux and China, the OE Group has established itself as a global solutions provider – gaining Exporter of the Year Award, Going Global 2009.

With its headquarters in Wakefield, West Yorkshire, the company supports "Made in Britain" with in-house CAD design, plastic moulding, CNC machining, painting, assembly, 100% end-of-line testing and even web design. Managing the whole manufacturing process in-house allows complete control of quality and service which, in turn, has the effect of building confidence with the client. No better is this confidence exhibited than when clients ask us to help design and manufacture specific OEM products.

During the GFC, a policy of continued investment into new technologies, products and equipment, led to an explosion of revolutionary products, most notably with the unique USB TUF Charger in early 2013. Supporting "Made In Britain", Office Electrics commissioned a fully automatic socket assembly line (SAL), wholly designed and manufactured in the UK, which can now manufacture over half a million sockets per year. Feel free to watch SAL on YouTube.

MADE IN BRITAIN

In 2014, following a number of years during which the OE Group had been expanding into markets such as hospitality, education and transport, the company changed its name to OE Electrics, reflecting the fact that it was no longer simply a solutions provider to the commercial office industry, whilst still maintaining a connection to its roots.

OE Electrics solutions can now be found in call centres, cafes, hotels, hospitals, airport lounges, sports centres, shopping centres, service-counters, home offices, AV studios and many more - all over the world.

So, if you feel inspired to be different, and you would like to talk through your ideas, just give us a call and we will help you create exactly what you want. No-one can give you better service and support wherever you are and whatever your need.
