Ecotec

PP-RCT

made in Germany

Pipes made of PP-RCT with an outside layer in „Lilac“. These pipes are standard in Australia and New Zealand to transport recycled or reclaimed water.

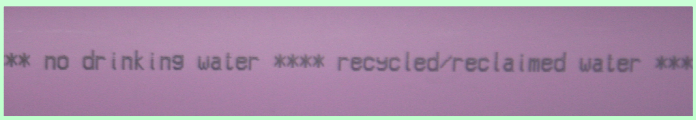

The pipes and all water outtake points need to be in the special colour „Lilac“. For the connection of the pipes you can use fittings in each colour.

- Colour Lilac
- Layer Double
- Material PP-RCT
- SDR class 9 / 11
- Pressure class PN16
- Dimensions d 20 - 110 mm

You can use the pipes for „Grey water“, „Drainage water“, „Rain water“ or any other application with non-potable water. So it`s very easy to see that it`s not allowed to drink water from this pipe.

- For recycled or reclaimed water applications
- Standard in Australia and New Zealand

SDR	Material	PN [bar]	Dim [mm]
9	PP-RCT	16	20 + 25
11	PP-RCT	16	32 - 110
